# Martin Kovac

Backend Developer

martin.kovac@example.com · +421 900 000 111 · Kosice, Slovakia · github.com/mkovac-dev

## Profile

Backend developer with 3 years of experience building REST API services in Java and Spring Boot. I enjoy clean code, automated testing and working with relational databases. Looking for a junior or medior backend role in a product team.

## Work Experience

**Backend Developer, NovaSoft s.r.o., Kosice (2023 - present)**

- Developed REST API microservices in Java 17 and Spring Boot for an internal ERP system.
- Designed SQL schemas and optimized queries in PostgreSQL and Microsoft SQL Server.
- Containerized services with Docker and maintained CI/CD pipelines in GitLab.
- Used Git with code reviews and pull requests in a team of 6 developers.

**Junior Java Developer (part-time), DataPoint a.s., Kosice (2021 - 2023)**

- Implemented new endpoints and unit tests with JUnit and Mockito.
- Wrote SQL reports and fixed bugs in a legacy Java application.

## Education

**Bachelor of Science in Computer Science**, Technical University of Kosice (2018 - 2021)

## Skills

Java, Spring Boot, REST API, SQL, PostgreSQL, Microsoft SQL Server, Docker, Git, JUnit, Maven, Linux, Python (basic)

## Languages

Slovak (native), English (B2, fluent in technical communication), German (A2)
